

Cross-Site BCC Research Ideas Proposed for Supplemental Funding

Please use the following template to briefly describe your proposed research project. The information you provide will be used to identify research projects and collaborating partners. Please keep responses to one paragraph or less for the first three items, and up to one additional page for each primary research question. Each linked subquestion may have its own response page.

1) Statement of primary research question (3-5 sentences):

2) Contribution of proposed activity to theory development/measurement enhancement (3-5 sentences):

3) BCC's unique position to address this research question (2-3 sentences):

Cross-Site Research/...

For one primary research question or several related subquestions (several related research issues may be packaged together if doing so presents a logical clustering) please address the following issues.

Specific research question (3-5 sentences):

Sites [i.e., List the BCC sites that will be involved (minimum of three) and indicate if these sites represent any special populations]:

Data [i.e., What general types of data will be collected and/or analyzed? Indicate if the use of existing or new data is being proposed]:

Timeframe (specify can be done immediately with existing baseline data and what might need to wait for outcome data, and how long proposed activities will take):

Analysis plans [all that is needed is a brief statement about overall analytical approach, identification of data analyst(s), whether this is to be done centrally or not, and coordination with data analysis and methods group]:

Estimated Resources [(direct dollars only) and brief budget justification (e.g., what % effort for what types of activities)]:

Team Leader/Team Members [please provide contact information for Team Leader]:
